MANHATTAN GAS WORKS, Oct. 23, 1822.

The Gas Regulator of Dr. Kidder is, in my opinion, the most valueble instrument for regulating the flow of gas to the burners that I have ever seen.

It is correct to principle, and will accomplish admirably the objects for which it was designed.

It will beare great steadiness in the lights and as the pressures at the meter is, by this instrument, reduced considerably below that on the street mains, it will enable the consumer to gain an equal amount of light at a smaller expenditure for gas can be easily amount of light at a smaller expenditure for gas can be consumed, the greater is the amount of light obtained.
